

OSA-0851-64

10 February 1964

MEMORANDUM FOR: Career Management Officer, DD/S&T

SUBJECT:

1. In accordance with your discussions with EXO/OSA on 28 January, we have taken a long hard look at the Navy records of [redacted] who was referred to us indirectly by Dr. Wheelon.

2. The general consensus of opinion here among the principals is that in view of [redacted] long and significant experience in the field of guided missiles and associated technology, that his staff talents might be better employed in areas such as OSI and FMSAC.

3. We have noted the fact that he also had experience in the field of aeronautical engineering, although he has no formal education in that field, but in view of our recent acquisition of [redacted] to cover the aeronautical engineering side, it is doubtful that we require duplicate skills in that area. In the event that DD/S&T acquires a major responsibility in the field of new satellite systems, it might be profitable to re-examine DSA's position in this officer's case. I am returning his files to [redacted] to hold until he hears from you that they can be returned to Navy or passed on to [redacted]

**Deputy Assistant Director
(Special Activities)**
